
■ EHR Implementation Specialist Roadmap Action Kit

Portfolio templates, interview questions, resume formulas, and your 90-day execution plan.

What is inside this kit:

1. 90-Day Execution Plan with weekly milestones
2. Portfolio Project Templates with starter prompts
3. Resume Bullet Formulas that translate your clinical experience
4. Interview Preparation Questions specific to this role
5. Resource Checklist with direct links

Difficulty: Low | Timeline: 1 to 3 months | Last Updated: 2026-03-24

Built by a pharmacist who made the switch. roadmaps.tarvra.com

1. Your 90-Day Execution Plan

This plan breaks the learning path into weekly milestones. Adjust the pace to fit your schedule, but try to maintain momentum. Consistency matters more than speed.

Phase 1: Foundation

Duration: 1 to 8

Effort: 26 to 39

Week	Focus Area	Done?
Week 1	EHR Platform Fundamentals	■
Week 2	Healthcare Data Standards Overview	■
Week 3	Clinical Workflow Analysis Methods	■
Week 4	Module Identification	■

✓ **Phase Checkpoint:** 1-page summary mapping clinical strengths to EHR module. Complete one free training module with learning summary.

Phase 2: Technical Depth

Duration: 8 to 24

Effort: 70 to 90

Week	Focus Area	Done?
Week 5	EHR System Configuration for chosen module	■
Week 6	Training Design and Delivery	■
Week 7	System Testing and Validation	■
Week 8	Go-Live Support Methodology	■

✓ **Phase Checkpoint:** Complete platform training. Design a training program. Participate in implementation or optimization project.

Phase 3: Specialization

Duration: 24 to 36

Effort: 40 to 80

Week	Focus Area	Done?
Week 9	Track A: Epic Module Specialization	■
Week 10	Track B: Cerner Specialization	■
Week 11	Track C: Implementation Consulting	■
Week 12	Track D: Training and Adoption Leadership	■

✓ **Phase Checkpoint:** Deep specialization in chosen track.

2. Portfolio Project Templates

Each template gives you the project brief, tools needed, and starter prompts to begin immediately. Your clinical background is your competitive advantage.

Project 1: Clinical Workflow Documentation and Redesign

Time Estimate: 4 to 6 weeks

Document medication administration workflow from current state, identify bottlenecks, propose EHR configuration to optimize the workflow.

Tools: Workflow mapping, Process documentation, EHR configuration design

✓ **Your Clinical Advantage:** You understand the real workflow including workarounds, not the theoretical one

Starter Prompts (begin with these questions):

- What specific problem does this project solve for clinicians or patients?
- What data would I need, and what are the realistic constraints on getting it?
- How would I measure whether my solution actually works in a clinical setting?
- What would a hiring manager want to see in my write-up of this project?

Project 2: Training Program Design

Time Estimate: 4 to 6 weeks

Create comprehensive training curriculum, materials, and assessment for medication administration module with super user guides.

Tools: Instructional design, Documentation, Video training

✓ **Your Clinical Advantage:** You understand what clinicians need to learn and how they learn best

Starter Prompts (begin with these questions):

- What specific problem does this project solve for clinicians or patients?
- What data would I need, and what are the realistic constraints on getting it?
- How would I measure whether my solution actually works in a clinical setting?
- What would a hiring manager want to see in my write-up of this project?

Project 3: Go-Live Readiness Assessment and Issue Log

Time Estimate: Ongoing during implementation

Develop go-live readiness checklist, identify configuration gaps, create issue tracking and escalation process for go-live support.

Tools: Project management, Issue tracking, EHR configuration

✓ **Your Clinical Advantage:** You know what can go wrong clinically and what safety issues must be prevented

Starter Prompts (begin with these questions):

- What specific problem does this project solve for clinicians or patients?
- What data would I need, and what are the realistic constraints on getting it?
- How would I measure whether my solution actually works in a clinical setting?
- What would a hiring manager want to see in my write-up of this project?

Project 4: EHR Configuration Documentation

Time Estimate: Ongoing

Create build specifications, test scripts, and technical documentation for medication administration module build.

Tools: Technical documentation, Testing scripts, EHR builds

✓ **Your Clinical Advantage:** You understand how clinical workflows should map to system configuration

Starter Prompts (begin with these questions):

- What specific problem does this project solve for clinicians or patients?
- What data would I need, and what are the realistic constraints on getting it?
- How would I measure whether my solution actually works in a clinical setting?
- What would a hiring manager want to see in my write-up of this project?

Project 5: Clinical Decision Support Design and Testing

Time Estimate: 5 to 7 weeks

Design drug-drug interaction alert logic, create testing protocol, validate alerts against real clinical scenarios.

Tools: CDS rule design, Testing, Clinical validation

✓ **Your Clinical Advantage:** You understand safety-critical alerts from clinical experience

Starter Prompts (begin with these questions):

- What specific problem does this project solve for clinicians or patients?
- What data would I need, and what are the realistic constraints on getting it?
- How would I measure whether my solution actually works in a clinical setting?
- What would a hiring manager want to see in my write-up of this project?

3. Resume Bullet Formulas

Use these formulas to translate your clinical experience into language hiring managers recognize. Each formula follows the pattern: Clinical Skill translated to Tech Equivalent with context.

For Nurses

Clinical: Inpatient workflow expertise	Translates to: EHR documentation template and order set design
<i>How to frame it:</i> You understand workflows that system configuration must support	
Clinical: Medication administration and safety knowledge	Translates to: Medication workflow module configuration
<i>How to frame it:</i> Your safety expertise becomes system rules and workflows	
Clinical: Care coordination across units	Translates to: Discharge planning and referral workflow design
<i>How to frame it:</i> You understand handoffs that systems must facilitate	
Clinical: Patient safety and quality auditing	Translates to: Test plan design and clinical validation
<i>How to frame it:</i> Your quality mindset becomes testing strategy	
Clinical: Super user experience	Translates to: End-user training and go-live support
<i>How to frame it:</i> You already teach and support others using systems	

For Pharmacists

Clinical: Drug-drug interaction expertise	Translates to: CDS rule building (hard-stop vs. alert-only)
<i>How to frame it:</i> Your interaction knowledge becomes system logic	
Clinical: Medication therapy management workflows	Translates to: Pharmacy module configuration
<i>How to frame it:</i> You understand MTM workflows that systems must support	

Clinical: Dispensing and inventory management

Translates to: ADC integration and barcode verification

How to frame it: Your dispensing expertise guides system setup

Clinical: Prescriber communication

Translates to: Provider order entry screen design

How to frame it: You understand provider needs for order entry

Clinical: Patient education skills

Translates to: Training program design and adoption management

How to frame it: Your communication skills apply to end-user training

For Other Clinicians

Clinical: Specialty-specific workflows

Translates to: Department-level system configuration

How to frame it: Your expertise guides configuration in your specialty

Clinical: Equipment integration knowledge

Translates to: System interface design

How to frame it: You understand clinical equipment that must integrate with EHR

Clinical: Quality control and standards compliance

Translates to: Testing and validation strategy

How to frame it: You understand clinical standards systems must meet

Resume Bullet Template:

[Action verb] + [what you did in clinical terms] + [translated to tech impact] + [quantified result if possible]

Example: "Designed and maintained medication safety dashboards tracking 12,000+ monthly dispensing events, reducing near-miss medication errors by identifying data anomalies in real-time reporting workflows."

4. Interview Preparation Questions

Technical Questions

Q1: Walk me through the phases of an EHR implementation project. What happens at each stage?

Your answer notes:

Q2: How do you handle scope creep during a go-live? Give a specific example.

Your answer notes:

Q3: What is your approach to training end users who are resistant to the new system?

Your answer notes:

Q4: How do you build EHR order sets or clinical documentation templates? What input do you need from clinicians?

Your answer notes:

Q5: Describe your experience with workflow mapping. How do you identify where the current workflow breaks?

Your answer notes:

Behavioral Questions

Q1: Tell me about a go-live that did not go as planned. What happened and how did you respond?

Your answer notes:

Q2: How do you manage relationships with clinical champions during an implementation?

Your answer notes:

Q3: Describe a time when you had to push back on a customization request that would create downstream problems.

Your answer notes:

Q4: How do you support end users during the first week after go-live when frustration is highest?

Your answer notes:

Scenario Questions

Q1: A nursing unit is refusing to adopt the new documentation workflow. They say it takes twice as long. What do you do?

Your answer notes:

Q2: You are 3 weeks from go-live and discover a critical workflow gap. How do you handle it?

Your answer notes:

Q3: A physician champion just left the organization mid-implementation. How do you recover?

Your answer notes:

5. Resource Checklist

Every resource mentioned in the roadmap, organized by learning phase. Check them off as you complete each one.

Phase 1: Foundation

Done ?	Resource	Type	Link
■	Epic Efficiency Training	FREE	https://efficiency.epic.com/
■	Cerner uLearn	PAID	https://ulearn.cerner.com/
■	HL7 Fundamentals free course	FREE	https://learning.cloudfoundation.com/p/hl7-tr...
■	AHRQ toolkit	FREE	https://www.healthit.gov

Phase 2: Technical Depth

Done ?	Resource	Type	Link
■	Epic Training site	PAID	https://training.epic.com/
■	Cerner training	PAID	https://ulearn.cerner.com/
■	HIMSS EHR Training for Nurse Leaders	PAID	https://www.himss.org/resources/electronic-he...
■	AHRQ Workflow Redesign guidance	FREE	https://www.healthit.gov/faq/how-should-we-ap...

Phase 3: Specialization

Done ?	Resource	Type	Link
■	Epic module-specific training	PAID	https://training.epic.com/
■	Cerner module training	PAID	https://ulearn.cerner.com/
■	Implementation consulting resources	FREE	https://www.hirecruiting.com/newsroom/the-ess...

What to do next:

1. Take the Career Quiz to confirm this role fits you: quiz.ehoneahobed.com
2. Subscribe to The Transmutation for weekly insights: thetransmutation.substack.com
3. Complete Move 1 from your roadmap today. It takes less than 3 hours.
